## Teacher Directions:

Fill each small boxes with the date of the current month.

## Student Directions:

The student will fill out the second page with the title and author of the book they are currently reading. The student will then place the number that is next to the current book they are reading and place it next to the date on their calendar. Below the date and number, the student will write the amount of time they spent reading for that day. At the end of the week, the student will have a guardian sign their calendar acknowledging that the student has read that week.
